**Subject:** RE: Gorge Dam Removal, Sampling Plan

Hi Chuck,

Thanks to SMP for volunteering to mow and remove vegetation to clear the path to the soil borings and piezometers. The labor hours and use of equipment can be counted as match towards the GLLA project, so please keep track of time and expenses and provide that information to Bill Z. If you have any questions about what is an eligible cost, please let me know.

Per your summary below, all disturbed areas visible from the trail and within 20 feet of the trail/access roads must be restored. A couple of folks who were at the recon mentioned to me that you all talked briefly about SMP conducting the site restoration activities if that could be counted as match. Yes, those activities can count as non-federal match, as well. Is that something that SMP would like to take on?

-Mary Beth

Julie-Drew,

In follow up to the email below.

Item 5: Metro Parks will provide mowing/vegetation removal necessary for the soil borings and piezometers. Coordinate the mowing Directly with the Park Manager, **Dave Rankin** (copied).

Item 8: Drone and field surveying. Fill out the attached SUP (Special Use Permit) for the field surveying (conventional/on foot) and drone surveying. Include an updated Figure 4 from the Sampling Plan. Submit the SUP to **Aaron Hockman**, Chief of Operations. Aaron will follow up with additional instructions/information.

Please follow the attached BMPs for all work.

Thank you,

**Charles A. Hauber, PE, PS**

**Subject:** Gorge Dam Removal, Sampling Plan

Thanks for everyone's time this AM. These early coordination meetings will save us time and effort in the future. A few of the items noted below will be written into Exhibit B, scope of work. Let me know if I left anything out, in summary:

1. Jacobs will provide an updated Figure 4 (copy attached) showing:
  - a. The updated and approximate boring locations and access routes. Final boring locations and access routes will be field determined by Metro Parks and the contractor with final approval by Metro Parks.
  - b. Contractor parking and staging areas for vehicles, equipment and materials.
  - c. Staging location for barrels (drums) with material samples.
  - d. Piezometers will be placed at least 20 feet from the trail or access road.
2. Jacobs/their contractor is responsible for the security of all equipment and materials on site.
3. Work hours are weekdays 7AM to 530PM. No work is permitted on weekends. Work on holidays or beyond 530 must be approved in advance by the Park Manager.
4. Contractor will restore disturbed areas visible from the trail and within 20 feet of the trail/access roads.
5. Brush and other vegetation will not be piled. Brush, trimmed branches and other items will be spread and disbursed.
6. Cone-off or tape off along the Chuckery Wall near Front Street and the River, to protect the wall.
7. Waterline drawings attached. Please note there is a sewer along the north side of the park drive. You may need to re-plan some of the proposed access routes. Any access over/near the existing sewers must be coordinated with the City of Akron.
8. Regarding the drone and surveying, I will forward a special use permit for Jacobs to complete. The field (ground surveying) and drone will be covered under that permit. Please complete and return the permit when I forward it to Jacobs.
9. Expanding the project limits (sediment spoil area) may require additional coordination from SHPO.

Thanks, call if questions.

Thank you,
